

Revealed to Americans for the first time...

# The health dangers of SLEEPING on a Hartmann line!

**The entire earth** is threaded with an invisible grid of Hartmann lines. They appear every 6-8 feet. They are named after the German medical doctor Ernst Hartmann.

If your bedroom or work area lies over these lines, there is a good chance you have serious health problems. Heart attack victims often sleep on a Hartmann line. So do insomniacs.

This man sleeps with his head and back on two intersecting Hartmann lines. He suffers from severe **migraines and backaches**.

This woman sleeps with her chest on two intersecting Hartmann lines. She suffers from chronic **asthma and bronchitis**.

This man doesn't sleep on any Hartmann line. He sleeps in a neutral zone. He enjoys **great health and vitality**. All 3 cases are medically documented.

*If you sleep or work on an invisible 'Hartmann line', all the vitamins in the world may not help you!*

Very few people in America have heard of Hartmann lines. They were discovered almost 40 years ago by a famous German medical doctor named Ernst Hartmann.

Last month, we sent one of our staff reporters, Nick Aberdeen, to West Germany to interview Dr. Hartmann. Dr. Hartmann is a pioneer in the field of

Geobiology. This is the study of how the earth affects your health. In Germany, there are many geobiologists who visit a patient's house, much like doctors used to do in this country. But they are not there to check the patient. They are there to check the *ground upon which the patient lives*.

**"Once I went to a man's home and warned him not to sleep in a certain spot. He thought I was a fool. Twelve years later he died of cancer."**

-- Ernst Hartmann, M.D.  
Eberbach, West Germany

**This tree is dying of a fungus**

But it is not surprising. It sits on a 'Hartmann Knot' -- where two intersecting Hartmann lines meet. The woman is Blanche Merz, a Swiss geologist. She is using a special rod to detect these invisible lines. If these rays can kill a tree, just imagine what they can do to your health!

Then the geobiologist -- one of Dr. Hartmann's students -- gives the patient a number of recommendations. The most important advice is to learn exactly where in the bedroom to place the bed. I know this doesn't sound scientific, but Dr. Hartmann said he has 40 years of extensive medical documentation to back up his claims.

Dr. Hartmann has published three highly technical books on his work. (All in German.) He also publishes a magazine for scientists entitled, "Wetter, Boden und Mensch" -- Weather, Earth and Man.

Cats love to sleep on Hartmann lines. It's good for the cat. This means if your cat likes your bed, you should move the bed.

**If your cat loves your bed, move the bed!**

A woman in Germany had three cats. They all slept on one tiny spot on the bed when she wasn't there. The woman also slept on this *same* spot. It went right through her chest area. She died of **breast cancer!**

Another expert we interviewed on Hartmann lines was Blanche Merz, a famous geobiologist from Vevey, Switzerland. She has been studying this topic for twenty years. Mrs. Merz was originally in Swiss politics, but she found this topic so fascinating she left public office and devoted full time to the study of Hartmann lines.

She is the author of two books on the subject, one in French called, "The Soul of the Place," and the other called "Points of Cosmic Energy."

**"Hartmann lines are the earth's aura. They flow in two directions: North and South, and East and West."**

Dr. Hartmann first discovered the Hartmann lines in 1950 while he was dowsing for water. He detected rays coming out of the earth which were completely *independent* of the underground water lines. He says the Hartmann rays are the Earth's aura, similar to the aura that can be seen or photographed around a flower or human body.

The Hartmann lines appear as a grid. They cover the entire earth. The lines run in two directions: north and south and east and west. The north-south Hartmann lines appear about every 6 feet, 6 inches. The east-west Hartmann lines appear about every 8 feet, 2 inches.

These are the measurements for Germany. They are slightly different for America. They vary, depending on where you live. When you go towards the equator, these distances increase. The Hartmann lines intensify every 30 feet.

The Hartmann line itself is just over 8 inches in

**Three people died of stomach cancer. Same spot in house!**

In different generations, three people slept in the same bed. The bed was where two Hartmann lines crossed. They all died of stomach cancer.

**It is best to sleep in a 'neutral zone.'**

For optimal health, sleep in a neutral Hartmann zone (shaded area). Best in center area.

A Swiss surgeon noticed that the patients he put in one recovery room always got *worse* or died. The patients he put in another room, a neutral zone, always recovered quickly.

width. It penetrates everything in its path. If you live on the top floor of a skyscraper, the rays will cut through the entire building and still affect you.

**"If a baby is placed in a crib on a Hartmann line, it will cry like mad! When you move the crib, the baby will stop crying."**

-- Dr. Hartmann

Blanche Merz showed me how to detect these lines with a special Hartmann dowsing rod. After a few tries, I was able to do it. The lines are more intense at night, but they are undetectable on nights around the full moon. Dr. Hartmann stressed that these lines are impossible to detect reliably with even the most advanced scientific equipment. "There is nothing as sensitive as the human body."

**Once a horse was tied up right on a Hartmann line. Within one year it was blind.**

If you sleep on a north-south Hartmann line, you are prone to suffer from *cramps* and *rheumatism*. If you sleep on the east-west line, you are more prone to *inflammations*.

The worst place you can possibly sleep or work is over a "Hartmann knot." This is where two Hartmann lines cross. This is called a "Geopathic"

### Cracks in roads are often on Hartmann lines.

Did you ever wonder why potholes appear at the same place in the road -- year after year? It's not wear and tear. It's usually because of a Hartmann knot. The force of the ray weakens the road.

point. "Geo" means earth and "pathic" means disease. This is a spot on the earth which can dramatically *weaken* the cells in your body. Many people who sleep on such spots become seriously ill -- in spite of a healthy diet.

### A 14-year-old boy in Italy could actually see the Hartmann lines. The N-S line was blue-green. The E-W line was orange-red.

Most animals instinctively avoid such points. But cats love Hartmann lines. So do ants and termites. Dogs and horses avoid the lines. Once an owner tied up a dog right on a Hartmann knot. It was always barking and crying. Within one year it developed arthritis and cramps. Cows which are milked on these lines often suffer from mastitis.

Blanche Merz told me that Hartmann lines are one of the reasons many people do not get cured at the healing waters in Lourdes, France. The water is beneficial, but then they go home to sleep on a Hartmann knot! It negates the treatment.

### One woman in Germany could not have a baby for 15 years. She slept on a Hartmann 'knot.' Dr. Hartmann moved her bed. Within one year she had a baby!

The ancient Egyptians were well aware of these lines. The burial chambers in the Pyramids were always in 'neutral' Hartmann zones. This is one of the key reasons the mummies never dec-

### Ants love to build hills on Hartmann lines.

Ants and termites usually build their homes right on a N-S Hartmann line. (They also like water lines.)

The ancient Romans used to place ant farms on the spot where they intended to build a home. If the ants stayed, they chose another place to build. (Permission for picture given by Blanche Merz.)

### The bull had no desire to mate cows.

A Swiss farmer bought a rare bull from Hungary because of its potent reproductive abilities. But when the bull arrived in Switzerland, it had no desire for cows.

They checked his stall and found it was right on a Hartmann line. They moved him to another stall at night. Very soon, he started chasing cows in the field!

ayed. Many house plants will die within 24 hours if you put them on a Hartmann knot. Cactuses however, seem to love the Hartmann knots.

### In one study, 30% of the people were cured of health problems. All they did was move their bed.

Birds in nature will rarely build a nest on a Hartmann line. A lot of pet birds die because their owners unknowingly put the cage right on a Hartmann knot!

Twelve hours before every earthquake, there are major changes in the Hartmann lines. The lines become erratic and 'secondary' Hartmann lines intensify. This is why dogs howl madly and birds try to get out of their cages, and certain cats hide under the quilts. They detect these changes.

Dr. Hartmann once told a woman, "You're lucky you don't sleep on that spot." She replied, "Oh, God, that's where my grandmother died!" ■

#### Recommendations:

1. Most important. Do not sleep in a bed with a metal frame or a mattress with metal springs. The metal will carry the current of the Hartmann line. This means that even if you sleep in a neutral zone, it is *as if* you are sleeping right on a Hartmann line. The metal *extends* the field of the line. Wood is best. This is critical.
2. Try moving your bed if you are sick.
3. Sleep with your head to the north and your feet south. Or with your head to the east. Any other direction will *weaken* your body and you will wake up tired!

**The Hartmann dowsing rod.** We are still looking into the possibility of offering these to readers. We will mention this in a future issue. You may be able to get one made at a metal shop.

Here is the shape. It is made of solid brass. This is a neutral metal. Anything else will conduct a current, which you don't want.

**Special thanks** to my dear friend Maryse in Lille, France. She set up both interviews with Dr. Hartmann in Germany and Blanche Merz in Switzerland. She made all my reservations and fed me like a king while I stayed with her family. Merci Maryse! Vive L'Lille. -- Nick

# There are hundreds of books on herbs, but if you get cancer, they won't help you. — Sam Biser

## Using herbs to cure a sore throat is completely different from using herbs to kill cancer.

If you were a close personal friend, I would have to tell you the truth.

Most people do NOT get any results from using herbs for cancer.

You must know how to use herbs -- or else they simply don't work. Many people use the right herb, but the wrong part of the herb -- and NOTHING happens.

For example, they use the leaf instead of the root, or the root instead of the flower.

Or else they use the right herb, but prepare it wrong. Many herbs must be simmered for twenty minutes to activate them, but others are too delicate, and will be destroyed after three minutes.

Now if you're taking herbs for a sore throat, it really doesn't matter all that much if you do something which destroys 73% of an herb's potency. But when you're talking about cancer, it DOES make a difference -- the difference between life and death.

### Most of this knowledge has never been assembled in one place.

The facts and answers were scattered in dozens and dozens of different sources. A lot of the information came from out-of-print books and periodicals. Many of these answers never existed at all -- in any form -- until I put them together.

I rediscovered old potent herbal formulas that were used -- and then forgotten. WHY? Because around the turn of the century, modern medicine tightened its grip on the healing arts, and most of these formulas disappeared from history.

### When you have cancer, you need specialized herbal knowledge -- and this knowledge does not exist in any herbal book I have ever read.

You need the knowledge that in the past was only known to master herbalists -- but you need it in a simple form that you can use. You do not need to know the technical names of herbs -- any more than you need to know how a car works.

But you do need to know how to get the maximum potency from the herbs that Nature has placed on this planet.

Most of this knowledge has never been written down. It belongs to the oral tradition of ancient herbalism.

Nature must be laughing at us -- searching desperately for answers to all our diseases -- hoping beyond hope that a new miracle drug will one day be "discovered", when the answers we need are growing in every direction the eye can see.

\* One herb which is one of the most powerful blood cleansers in nature is considered a common weed. It grows wild right outside my door! It is usually thrown out! All these years and I didn't even know what it was.

\* One herb which has a rare ability to make tumors vanish is a common agricultural pest! Farmers used to be heavily fined in France if they let this weed grow! This same weed saved one woman from devastating breast cancer.

\* Children are yelled at for bringing into the home those burrs from the forest which stick to their clothes. Yell at them no longer. They are bringing in the flowers of one of the most potent cancer-fighting herbs on the planet.

### Colon cancer healed by herbs... Doctor cancels operation.

One of our readers was dying with colon cancer. His doctor had scheduled an operation for him at the Mayo Clinic. They were going to remove sections of his cancerous colon. It was the only option left.

What the doctor didn't know was that the patient had begun to follow the advice presented in my Layman's Course on Killing Cancer. This course presents powerful herbal advice on reversing cancer. The patient followed just a few key suggestions. Ten days later, he went back to his doctor for a last-minute check-up before the surgery. His doctor retested him and was confused. He said, "With this kind of improvement, let's hold off on the surgery."

To order, send your check or money order (or call toll-free 800 277-5260) to Health Discoveries Newsletter, P.O. Box 348, Dept. LC, Ivy, Va 22945. The price is \$195 plus \$6 shipping and handling.
